SAVE BARNEGAT BAY !!
***VITAL FERTILIZER BILL ***

Joint State Senate & Assembly
Environment Committee Hearing

Thursday, August 12
10 AM to Noon

At Toms River Town Hall
33 Washington Street

Senator Bob Smith and Assemblyman John McKeon have introduced a bill that **will require all lawn fertilizer sold or used in New Jersey to have at least 30% slow release Nitrogen.** This is a potential major victory for Barnegat Bay. But the fertilizer industry is adamantly opposed and *favors a mere labeling law.*

We must all support this legislation, and oppose a labeling law. A large crowd in Toms River will send a message to Trenton. It is do or die for Barnegat Bay.
